The screenshot shows the SAP Help Portal interface. At the top, the SAP logo is followed by the tagline "The Best-Run Businesses Run SAP". A search bar is located in the top right corner. Below the logo, there is a navigation menu with categories like "SAP Business Suite", "Technology", "Application Lifecycle Mgmt", and "Mobile". The "Technology" category is selected, and a sub-menu is visible with options like "Analytics", "SAP Best Practices", "Database", "SAP Business One", "SAP In-Memory Computing", "Cloud", and "Additional Information". The main content area displays the title "User Interface Add-On for SAP NetWeaver" and a search bar. Below this, the page title "SAP NetWeaver Business Client" is prominently displayed. The main text describes the SAP NetWeaver Business Client (NWBC) as a user interface (UI) that presents a single entry point to different SAP business applications and technologies. It is a high-fidelity shell that integrates various UI technologies and design generations aimed at a more efficient, intuitive, and complete user experience over different UI technologies. Within the SAP NetWeaver Business Client, users can move seamlessly between Web Dynpro and SAP GUI transaction.
